

Thermally insulated flexible air duct FAT

Description

Flexible air duct Aluflex THERMO for heating, cooling, ventilation and air conditioning systems under low and medium pressure. Effectively prevents condensation and heat or cold loss.

Technical data

Construction	Made from flexible air duct FA with 16kg/m ³ glass wool insulation 25mm thick with metalized polyester outer jacket.
Temperature range	-30°C to +140°C
Max air speed	30 m/sec
Maximum pressure	2500 Pa
Min. bend radius	0,6Ø+25mm
Sizes	Ø100; Ø125; Ø150; Ø160; Ø200; Ø250; Ø315mm
Length	10m
Colors	Metallic
